TITLE INDEX

	Page		Page
Agitated liquid/liquid dispersions, a study of: Part I—Dynamic response of dispersion geometry to changes in composition and temperature by M. S. Hoffer and W. Resnick	1	Flow patterns and axial mixing in liquid/liquid spray columns. Part IV: Detection of a multiple circulation pattern generated by the application of a positive temperature gradient by H. E. A. van den Akker and W. Rietema	147
Agitated liquid/liquid dispersions, a study of: Part II—Dependence of steady-state dispersion geometry on phase composition and location by M. S. Hoffer and W. Resnick . .	8	Froth regime point efficiency for gas-film controlled mass transfer on a two-dimensional sieve tray by M. J. Lockett, R. D. Kirkpatrick and M. S. Uddin	25
Algebraic expression for first-order reaction in laminar flow by M. H. Hilder	143	Gas discharge from an orifice into a gas fluidised bed by P. N. Rowe, H. J. Macmillan, H. J. MacGillivray and D. J. Cheesman	194
Application of several Kalman filters to the control of a real chemical reactor by R. J. Litchfield, K. S. Campbell and A. Lock	113	Generalised method for predicting the spray-bubbling transition of sieve plates by P. F. Y. Wong and W. K. Kwan	205
Batch and continuous sedimentation behaviour of flocculated china clay slurries by Z. Khatib and J. A. Howell	170	Growth and dissolution kinetics of potassium sulphate crystals in a fluidised bed crystalliser by N. S. Tavare and M. R. Chivate . .	35
Blast waves generated by the rupture of gas pressurised ductile pipes by M. R. Baum	15	Heat and mass transfer downstream of abrupt nozzle expansions in turbulent flow by D. J. Tagg, M. A. Patrick and A. A. Wragg . .	176
Bubble growth theory of fluidised bed reactors by R. C. Darton . .	134	Heat transfer to Newtonian liquids in laminar flow in straight horizontal elliptical tubes by D. R. Oliver and S. S. Rao	104
Circulation cell model for bubble columns by J. B. Joshi and M. M. Sharma	244	Horizontal two-phase flow of liquid water/water vapour through packed beds by I. W. Johnston and R. R. Politt	256
Computation of steady and unsteady, turbulent, chemically reacting flows in axisymmetric domains by N. C. G. Markatos and A. Moult	156	Hot wire anemometry method for the flow patterns in array of heat exchanger tubes by J. R. Turner and T. D. Eastop	139
Computational analysis of the effect of pressure on distillation column feed capacity by H. Z. Kister and I. D. Doig	43	Interpretation of metastable zone widths by J. W. Mullin and S. J. Jancic	188
Concentration limits to the initiation of unconfined detonation in fuel/air mixtures by D. C. Bull	219	Mass transfer to co-rotating discs: further studies on the rotating electrolyser by A. B. Ferreira and R. E. W. Jansson	262
Crystal growth rate determinations from desupersaturation measurements: nickel ammonium sulphate hexahydrate by H.-M. Ang and J. W. Mullin	237	Measurement of effective interfacial area in a packed column absorber by chemical methods by E. Alper	64
Dependency of growth on granule size in a spouted bed granulator by T. Robinson and B. Waldie	121	and Correction	216
Drop size distributions in an agitated liquid/liquid dispersion by B. W. Brooks	210	Modification of the thermal regenerator infinite conduction model to predict the effects of intraconduction by P. J. Heggs and K. J. Carpenter	228
Effect of aeration on the flowability of powders by M. R. Judd and P. D. Dixon	67	Particle mixing and classification in liquid fluidised beds by M. R. Al-Dibouni and J. Garside	94
Effect of concentration on distillation plate efficiency by H. A. Mostafa	55	Process control with sampled feedback by J. O. Gray, Z. El-Dhuwaib and G. Hassapis	73
and Correction	216	Radial dispersion in vertically suspended packed baskets inside a bubble column by B. F. Alexander, Y. T. Shah and J. H. Wilson . .	252
Effect of fines on entrainment from gas fluidised beds by D. Geldart, J. Cullinan, S. Georgiades, D. Gilvray and D. J. Pope . .	269	Reaction of sulphur dioxide with limestone particles: the influence of sulphur trioxide by R. B. Fieldes, N. A. Burdett and J. F. Davidson	276
Effect of hydrogen partial pressure on the methane selectivity of hydrogenolysis reactions by O. Kuleli and K. Basar	70	Significance of particles entrained in bubbles on the products of fluidised bed gasification by R. M. Wood	213
Effect of some process variables on the thermal decomposition of molydenite in an induction-coupled argon plasma by M. G. Coleby and G. J. Davies	128	Solution of flow problems in highly irregular domains by the finite difference method by A. Moult, D. B. Spalding and N. C. G. Markatos	200
Effects of an electrostatic field and air stream on water spray droplet size by I. K. Smith and L. A. Garmendia	60	Study of agitated liquid/liquid dispersions: Part I and II. See Agitated liquid/liquid dispersions, a study of	
Evaluation of a new six-flux model for radiative transfer in rectangular enclosures by R. G. Siddall and N. Selcuk	163	Theory for cluster formation in vertically conveyed suspensions of intermediate density by J. R. Grace and J. Tuot	49
Explicit equations for the solution of turbulent pipe flow problems by Q. T. Pham	281	Variable flow start-up of a back-mixed reactor exhibiting multiple steady states by M. Basaran and R. Mann	182
Flow patterns and axial mixing in liquid/liquid spray columns. Part III: The reduction of axial mixing by applying a positive temperature gradient by H. E. A. van den Akker and K. Rietema . .	84
